CAREER SUMMARY:

WordPress Team Leader and Web Developer with 100+ websites delivered from start to finish. I build custom, dynamic websites using Elementor, ACF, and JetEngine, and I create custom plugins using vite coding to add unique features for client projects. I handle full setup and configuration across various client hosting platforms, including DNS and domain connections. Alongside hands-on work, I lead our developer team, guiding daily tasks, managing multiple clients, and making sure every site is fast, secure, and ready for launch.

WORK EXPERIENCE:

FB International BD

WordPress Developer | Elementor Expert

August 2025 – Present

- Lead a team of developers while managing multiple client projects at the same time, overseeing my team members' deliverables alongside my own hands-on work.
- Build responsive, dynamic websites from scratch, including eCommerce, booking, membership, and service-based platforms using WordPress, Elementor, ACF, and JetEngine.
- Develop custom WordPress plugins through vite coding to build unique features, solve specific client requirements, and reduce dependency on heavy third-party plugins.
- Configure and manage various client hosting platforms, server environments, domain setups, DNS records, and website migrations.
- Guide project timelines, review team member's projects, and handle client communication and technical troubleshooting across global marketplaces.

TrustyCoder

WordPress Web Developer | SEO Executive October

2024 - Present

At TrustyCoder, as a part-time, I developed & maintained a fully responsive website using HTML5, CSS3, WordPress, and frameworks like Tailwind CSS. I implemented effective on-page SEO strategies that significantly improved rankings & boosted organic traffic. I ensured seamless user experiences across all devices. Also optimized page speed, mobile responsiveness.

SKILLS:

- Frontend Web Development
- WordPress/Elementor Pro
- Jet Engine
- HTML, CSS, JavaScript
- React (learning)

EDUCATION:

Programming Hero
Web Development
Batch-10th

Creative IT Institute
Pro. Digital Marketing
December 2022 – June 2023

Northern University Bangladesh
Computer Science and
Engineering (CSE)
May 2016 – December 2020

PROJECTS:

Texas Truck Parts – WooCommerce E-commerce Website

- Built a custom e-commerce platform using WordPress & WooCommerce
- Implemented custom post types with JetEngine
- Integrated advanced product filtering using JetSmartFilters
- Managed bulk product imports via WP All Import
- Developed custom shipping logic for nationwide delivery
- Optimized for performance, responsiveness, and user experience

Selexy Properties Spain – Real Estate Listing Website

- Developed a real estate listing website using WordPress
- Created custom property listings with JetEngine (CPT)
- Implemented advanced search & filtering with JetSmartFilters
- Built a responsive, user-friendly interface
- Enabled easy property management from the backend

Custom Tea Blend E-Commerce Platform (WordPress)

- Designed and developed a custom e-commerce website for a tea brand featuring both pre-blended products and a fully custom **Build-Your-Own Tea Blend** system. Engineered a custom-coded blend builder that allows customers to select individual flavors and ingredients, dynamically visualize the blend in real time, and purchase it as a standard e-commerce product.
- Implemented upsell logic to combine pre-blended teas with custom blends, increasing average order value.
- Built smart product filtering using JetEngine to display category-specific items instantly, and developed a dedicated gift card purchasing system. Delivered a scalable, conversion-focused solution combining custom JavaScript logic, dynamic content, and WooCommerce integration.

CMS-Driven B2B Marketing Website

Built a dynamic, CMS-Driven B2B Marketing Website (Custom Post Types, JetEngine, Dynamic Templates)

- Developed a fully custom, dynamic WordPress site for a UK B2B LinkedIn marketing agency from **Figma to launch**.
- Leveraged **JetEngine** to build and manage **custom post types** (Services, Case Studies, and Packages), implemented advanced dynamic templates, and integrated **multiple forms** and interactive elements to enrich UX and client lead capture.

CMS-Driven Nonprofit Accelerator Website

Built Custom CMS-Driven Nonprofit Accelerator Website with Dynamic Content & UX Focus.

- Created a fully custom WordPress website for the Bowie Business Innovation Center, translating complex program structures and stakeholder needs into a dynamic, user-focused digital experience.
- Integrated CMS features for multiple programs (**accelerators, events, news, success stories**) and content sections, ensured scalable template architecture, and enhanced lead capture and informational workflows.
