CAREER SUMMARY:

I am a WordPress Web Developer with 1 year of experience, specializing in building dynamic and responsive websites, including service-based, eCommerce, booking, and membership platforms. Skilled in HTML, CSS, JavaScript, and tools like Crocoblock (JetEngine), I deliver scalable, user-friendly solutions. I also support team coordination and client communication, ensuring high-quality results and client satisfaction.

WORK EXPERIENCE:

FB International BD

WordPress Developer | Elementor Expert
August 2025 – Present

WordPress Web Developer with hands-on experience at FB International BD, specializing in building dynamic, responsive websites including service-based, eCommerce, booking, and membership platforms. Skilled in WordPress development, CMS integration, and advanced plugins such as Crocoblock (JetEngine). Actively contributes as a WordPress team co-leader, managing project assignments, timelines, team coordination, and client communication across marketplaces. Known for delivering high-quality web solutions efficiently while maintaining strong client satisfaction.

TrustyCoder

WordPress Web Developer | SEO Executive
October 2024 - Present

At TrustyCoder, as a part-time, I developed & maintained a fully responsive website using HTML5, CSS3, WordPress, and frameworks like Tailwind CSS. I implemented effective on-page SEO strategies that significantly improved rankings & boosted organic traffic. I ensured seamless user experiences across all devices. Also optimized page speed, mobile responsiveness.

Web Development
Batch-10th

Creative IT Institute
Pro. Digital Marketing
December 2022 – June 2023

Northern University
Bangladesh
Bachelor of Laws
May 2016 – December 2020

PROJECTS:

Texas Truck Parts – WooCommerce E-commerce Website

- Built a custom e-commerce platform using WordPress & WooCommerce
- Implemented custom post types with JetEngine
- Integrated advanced product filtering using JetSmartFilters
- Managed bulk product imports via WP All Import
- Developed custom shipping logic for nationwide delivery
- Optimized for performance, responsiveness, and user experience

Selexy Properties Spain – Real Estate Listing Website

- Developed a real estate listing website using WordPress
- Created custom property listings with JetEngine (CPT)
- Implemented advanced search & filtering with JetSmartFilters
- Built a responsive, user-friendly interface
- Enabled easy property management from the backend

Custom Tea Blend E-Commerce Platform (WordPress)

- Designed and developed a custom e-commerce website for a tea brand featuring both pre-blended products and a fully custom **Build-Your-Own Tea Blend** system. Engineered a custom-coded blend builder that allows customers to select individual flavors and ingredients, dynamically visualize the blend in real time, and purchase it as a standard e-commerce product.
- Implemented upsell logic to combine pre-blended teas with custom blends, increasing average order value.
- Built smart product filtering using JetEngine to display category-specific items instantly, and developed a dedicated gift card purchasing system. Delivered a scalable, conversion-focused solution combining custom JavaScript logic, dynamic content, and WooCommerce integration.

CMS-Driven B2B Marketing Website

Built a dynamic, CMS-Driven B2B Marketing Website (Custom Post Types, JetEngine, Dynamic Templates)

- Developed a fully custom, dynamic WordPress site for a UK B2B LinkedIn marketing agency from **Figma to launch**.
- Leveraged **JetEngine** to build and manage **custom post types** (Services, Case Studies, and Packages), implemented advanced dynamic templates, and integrated **multiple forms** and interactive elements to enrich UX and client lead capture.

CMS-Driven Nonprofit Accelerator Website

Built Custom CMS-Driven Nonprofit Accelerator Website with Dynamic Content & UX Focus.

- Created a fully custom WordPress website for the Bowie Business Innovation Center, translating complex program structures and stakeholder needs into a dynamic, user-focused digital experience.
- Integrated CMS features for multiple programs (**accelerators, events, news, success stories**) and content sections, ensured scalable template architecture, and enhanced lead capture and informational workflows.
